

Seif Eldin Mohamed Aboelhassan Mohamed Hendawy
Lab 4

ROLES

Create your first role with name (web)

The task book will include:

1. installing a package

(get the package name from vars)

2. copying a list of files from controller to host using loop

(get the list of file names from vars)

(the actual files will be stored in ./roles/web/files)

(will be executed only when the install task is in state: changed)

Restart the service of the installed package

(will be executed only when the copy task is in state: changed)

HANDLERS

The task book will include:

1. installing a package

(get the package name from vars)

2. copying a list of files from controller to host using loop

(get the list of file names from vars)

(the actual files will be stored in ./roles/web/files)

(will be executed using Handlers)

Restart the service of the installed package

(will be executed using Handlers chaining)

TEMPLATES

The task book will include:

1. installing a package

(get the package name from vars)

2. Copying a file from controller to host using template

(get the template name & template message from vars)

(the actual template file will be stored in ./roles/web/templates)

(will also notify the restart handler)

3. copying a list of files from controller to host using loop

(get the list of file names from vars)

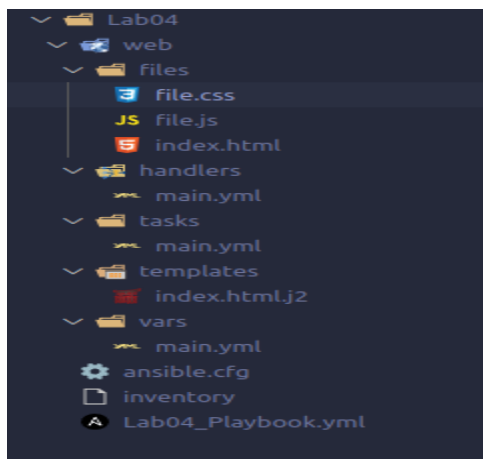

(the actual files will be stored in ./roles/web/files)

(will be executed using Handlers)

Restart the service of the installed package

(will be executed using Handlers chaining)

Role web

tasks/main.yml

```
Ansible Tasks Schema - Ansible tasks file (ansible.json)
---
- name: Install the package
  apt:
    name: "{{ pkg_name }}"
    state: present
    register: res

- name: print
  debug:
    msg: "{{ res }}"

- name: Copy index from controller to host
  template:
    src: "{{ tmp_name }}"
    dest: "/var/www/html/index.html"
    notify: Copy
    changed_when: true
```

templates/index.html.j2

```
main.yml  index.html.j2 x
Lab04 > web > templates > index.html.j2
1  <html>
2  <link rel="stylesheet" type="text/css" href="file.css">
3  <script src="file.js"></script>
4  <body>
5  <center>
6  <h1>{{ tmp_msg }}</h1>
7  </center>
8  </body>
9  </html>
10
```

vars/main.yml

```
Ansible Vars File - Ansible variables File (vars.json)
---
pkg_name: nginx
tmp_name: index.html.j2
tmp_msg: "Hello, My Name is Seif Hendawy, I'm A DevOps Engineer.<br> This is the Ansible course From ITI"
files_to_copy:
  # - index.html
  - file.css
  - file.js
```

handlers/main.yml

```
Ansible Tasks Schema - Ansible tasks file (ansible.json)
---
- name: Copy
  copy:
    src: "{{ item }}"
    dest: "/var/www/html/{{ item }}"
  loop: "{{ files_to_copy }}"
  notify: Copy files to host
  changed_when: true

- name: Copy files to host
  debug:
    msg: "Copying files from controller to host"
  notify: Restart service
  changed_when: true

- name: Restart service
  sysvinit:
    name: "{{ pkg_name }}"
    state: restarted
  when: res.changed != false
```

Playbook

```
Lab04 > A Lab04_Playbook.yml
1  - name: play 1
2    hosts: all
3    roles:
4      - web
5
```
